

Chemical Knowledge Base | MSDS | Chemical Approval

One of the most difficult challenges for organizations is to track and manage Material Safety Datasheets (MSDS) and provide important right-to-know information to sites/facility employees.

Lack of a centralized platform prevents corporate EH&S team to manage risks associated with use of high risk chemicals.

ProcessMAP offers industry's leading Chemicals Information & MSDS Management solution to allow all organization to centralize information related to chemicals/products used at sites/facilities, streamline material approval and acquisition process resulting in dramatic improvements in compliance, risk management, and efficiency.
