

# Create a Safe Working Environment While Increasing Productivity and Profits

WE EMPOWER A CULTURE OF SAFETY THROUGH REAL-TIME ANALYSIS, ENGAGEMENT, AND RECOGNITION

Empowers you with insight and predictive analytics to prevent incidents. Helps you create a safe workplace and promote a strong safety culture.

Engages, rewards, and recognizes employees who positively contribute to a safer working environment and exhibit the values of their organization.

Greatly reduces safety incidents, worker's comp claims, and quality defects, while increasing productivity, profitability, and sales.

## KEY BENEFITS

- Unleash the power of Safegagement™
- Highly engaged workers committed to the values of your organization
- Improved safety through root cause analysis and values-based rewards
- 100% OSHA® compliant safety solutions
- Streamlined incident reporting process
- Robust and predictive analytics for instant insights

Organization establishes safety rules and goals to keep its employees safe and to protect itself against the direct and indirect costs of Worker's Comp claims.

When an organization provides data, it is seamlessly integrated into both ProcessMAP and C.A. Short Company in a single instance, eliminating the need to submit data to each platform.

Organization's data is presented back in real-time dashboards using predictive analytics. It is also stored and filed for regulatory compliance and workers' compensation reporting.

When rule/behavior criteria is met, C.A. Short Company assigns points to employees for recognition and rewards. Employees can then exchange points for high-quality products, boosting engagement and encouraging behavior that reflects the values of the organization.

### RESULTS: THIS LEADING ACTION CREATES

- Efficient and streamlined processes for eliminating redundancy
- Reduces risks for safety incidents and audits, and handles regulatory compliance requirements
- Builds a culture of safety and loyalty among employees and staff
- Increases the bottom line by improving productivity, quality, and profitability
